Manufacturing technique

Performance is demonstrated just by also being able to master the latest equipments. For that purpose, know-how is indispensable. High Quality and highly precise goods are produced based on the accumulated know-how. Proprietary development of production line equipments are also possible.

In addition to a general production method, we introduce the manufacturing techniques which especially our company recommends.

Molding	Painting	Welding /assembly	Equipment
			
<ul style="list-style-type: none"> Film in mold Gas injection Counter pressure Metal insertion 	<ul style="list-style-type: none"> High-intensity paint Electric conduction paint 	<ul style="list-style-type: none"> Vibration welding Heat plate welding Impulse welding High frequency welding Ultrasonic welding Cell production Many-skilled worker training 	<ul style="list-style-type: none"> Head office factory Togane factory Sankyou
